

HOW TO ACTIVATE DAIKIN ISMILE WIFI?

Step 1: Download Daikin Mobile Controller App via Appstore / Playstore

Step 2: Press the [WPS] button on your Home router* approximately 5 secs for pairing mode

*Operation of the [WPS] differs according to your router

*For more information, see the manual of your router

*How long you need to press the [WPS] button depends on the router

Step 3: Open the cover of your air conditioner (A/C)

Step 4: Press the [SETUP] button on the D'mobile card until [RUN] LED light stops blinking

*Please record [KEY] found on D'mobile card for activation on the app

Step 5: Connect your mobile device to your Home router

Step 6: Go to Daikin Mobile Controller App (The A/C that you paired will appear. If no, tap on refresh button)

Step 7: Tap on the black note icon and enter the [KEY] found on the D'mobile card

Step 8: You can now control your A/C indoor

*Repeat Step 2 to 7 for the remaining A/C available

Turning off [RUN] LED light on the D'mobile card

Step 9a: On "Home" page, tap the air conditioner unit you want to operate

Step 9b: tap on gear icon in the top right of the screen to open settings screen

Step 9b: Under "Adapter LEDs" slide OFF

Setting up "Out-of-Home" function*

Step 10a: On "Home" page, tap the air conditioner unit you want to operate

Step 10b: Tap on gear icon in the top right of the screen to open settings screen

Step 10c: Under "Out-of-Home" Slide the bar to "ON"

Step 10d: Set a login ID and Password (*Do not slide OFF)

Step 10e: To set the remaining A/C, tap on the next A/C unit you want to operate and repeat step 9b and 9c.

Step 10f: Click "OK" when a message is displayed.

*To use "Out-of-Home" function,

you will need to be connected to your mobile data and Login using your login ID & Password
